

The image features two white, stylized human figures against a black background. The figures are composed of simple, rounded shapes, giving them a soft, almost sculptural appearance. They are positioned on the left and right sides of the frame, facing each other. The figure on the left is slightly taller and has its right arm raised towards its chest. The figure on the right is slightly shorter and has its left arm raised towards its chest. The overall composition is minimalist and evocative, suggesting a moment of connection or conversation.

*FOREVER MEETINGS*

March 20 - April 19, 2025

Opening Reception: Thursday, March 20, 6-8 PM

bitforms gallery is pleased to announce *FOREVER MEETINGS*, Sarah Rothberg's second exhibition with the gallery and debut New York solo exhibition. *FOREVER MEETINGS* continues the artist's research on the dynamics of conversation and large language models, culminating in a new body of generative artwork from which the exhibition takes its name.

Within each work a custom software program titled *FOREVER MEETINGS* prompts two AI agents, embodied as avatars, to have infinite, never-repeating conversations. The program uses a set of topics, conversation styles, and pairs of opposing personas as system prompts within each work. For example, one agent might be instructed to "role play as someone very selfish", while the other takes on the persona of selflessness. As the program exchanges responses, the discourse evolves and the generated script animates the avatars. All prompts are authored by the artist, representing dichotomies in the artist's own life. Their subjects engage ideas of morality, ownership, power, and relationships. *FOREVER MEETINGS* allow both the artist and the audience to observe the tendencies and patterns of AI models.

Three works using the *FOREVER MEETINGS* software are framed by bespoke hand-sculpted forms. These pieces introduce an adapted version of Rothberg's software where two set personas cycle through one question per day and one conversation type per hour. *FOREVER MEETINGS: DIALECTICS, BABY!* focuses on questions of gender, feminism, intergenerationality, and the nuclear family. While this theme never changes, every hour the avatars are programmed to shift their conversation type, ranging from argumentative to flirtatious language. In the work, *FOREVER MEETINGS: STRANGE ALIGNMENTS* two avatars pull and push against a wall towards each other, discussing the tradeoff of new technologies. This continues in perpetuity through a language model stored

# bitforms gallery

locally on the artwork's hard drive, serving as a 2025 time capsule of conversational AI. *FOREVER MEETINGS: GREY ZONE / OF TWO MINDS* delves into the personal relationship to systems while *PETTY TROLLEY PROBLEM* discusses power and its expressions. Rothberg's handmade frames are guided by intuition and mask the monitors beneath. As standalone sculptural objects, their glittering surfaces are charming, despite their spikes and hidden features.

This juxtaposition is mirrored by Rothberg's seemingly-emotive avatars that mask the work's purely computational AI output. When witnessing two avatars in conversation, moments of profound brilliance can strike. At times, the avatars can imitate thoughtful moments of reflecting "when the right time to have a baby might be", or if "tourism is bad". However, Rothberg seeks to remind viewers that an AI chatbot's "knowledge" is only in relation to the words that have been used to train the model. When the relatable statements are spoken by the avatars, it's only because those same words exist in relation to each other in the training set enough times for AI to make that association.

In 2023, bitforms presented Rothberg's first exhibition titled *SUPERPROMPT* that explored how "personas" can be assigned to AI chatbots. At the time, this simple mechanism for shaping a language model's output was sometimes referenced as a "superprompt", and is now called a "system prompt." *Sophie For You TTS* (text-to-speech) is a web-based work that allows visitors to interface with an embodied interactive chatbot named Sophie. The character Sophie was born from a ChatGPT description of an AI-hallucinated, non-existent performance allegedly staged by Rothberg. Within this "performance" a character named Sophie surveyed the intersection of artificial intelligence and human emotion. In the spirit of this AI hallucination, Sophie was designed as the avatar for the artist's conversational AI interface. When chatting with Sophie online, users can select a superprompt as a set of speaking conditions. The connection to a cloud-based API for the LLM and text to speech in *SOPHIE FOR YOU* means that this work changes as the technology evolves, unlike the static *FOREVER MEETINGS* which are tied to local models.

*HumanTTS: YOU* (human text-to-speech) grants the audience its first gallery encounter with Rothberg's *FOREVER MEETINGS* software, offering viewers a chance to read and recite an AI-generated text. The text, presented like a teleprompter for a conversation between two people, is situated on screens outfitted with microphones. Two monitors stand behind the microphones. As text appears, viewers can activate the work by speaking aloud into the microphones. Their voice animates the avatars in real-time. The script advances in an infinite, never-repeating loop that is echoed throughout the gallery between machines, avatars, and the artist.

Across the gallery, *HumanTTS: ME* (me text-to-speech) adds humanness back into the generative scripts produced by *FOREVER MEETINGS*. In this video, the artist edits and rewrites a script that is then programmed to be read aloud by two avatars. While *YOU* invites user participation, *ME* is a curated focus on discussions created by the software then rewritten by the artist. Both text-to-speech pieces invite the viewer to think deeply about their own language—including how it is used to inform large language models and how those models enfold back into our language. Hypothetical answers to Rothberg's own questions of virtue and integrity, such as "Is greed natural?", "Is making art a type of sickness", and "Why do people hold hands??" are edited in the artist's own voice and presented for the viewer to contemplate. The artist's text echoes in cacophony alongside visitor's voices, computer-generated AI transcripts, and Sophie's recitations.

*FOREVER MEETINGS* is supported by Onassis ONX.

The artist would like to graciously thank The Jerome Foundation for their support. The exhibition is produced in collaboration with Yotam Mann (AI System Engineer), Marpi (Animation System and Unity Developer), Nailah Hunter (Original Soundscape), Claire Hentschker (Frame Sparkle Engineer), and Han Zhang (Production Assistant).

SARAH ROTHBERG (b. 1987, Los Angeles, California) creates playful, poetic, usually-a-bit-weird experiences that invite you to reconsider your relationship to the world around you. These take many forms ranging from interactive installation, to performance, video, writing, workshops, and experiments with technology. The artist's experiences exist in a variety of contexts: at galleries, museums, festivals, on google docs, at the consumer electronics expo, screens in the NYC Subway system, zoom calls, secret twitter accounts, or MoMA. Some hosts have included: bitforms gallery, rhizome, NRW-forum, MTA Arts, Sotheby's S2, CultureHub, Gray Area Foundation, Apple stores around the world. The artist is a 2023 Jerome Hill Artist Fellow.

Rothberg is on the full-time faculty at NYU (interactive media at ITP), a member of Onassis ONX, and a mentor/former-member at NEW INC. Rothberg is also part of collaboratives: MORE&MORE UNLIMITED, which facilitates workshops for imagining changed worlds, and IS THIS THING ON? a post-web2 experiment in artist-driven livestreaming.

---

Founded in 2001, bitforms gallery represents established, mid-career, and emerging artists critically engaged with new technologies. Spanning the rich history of media art through its current developments, the gallery's program offers an incisive perspective on the fields of digital, internet, time-based, and new media art forms. For press inquiries, please contact [info@bitforms.art](mailto:info@bitforms.art) or call (212) 366-6939
